

Data from Veitch et al.

Reliability Study Data

Parents who were willing to participate were asked to complete the survey on two occasions (times one and two), two weeks apart.

The data for weekdays that were used for ICCs are described below.

Reliability items from time 1:

Q63a: how many days child plays in yard at home how many days child plays in

Q63b: how many days child plays in friends's/neighbour's yard

Q63c: how many days child plays on own street/court/footpath

Q63d: how many days child plays on nearby streets/courts/footpaths

Q63e: how many days child plays in park/playground

Q63f: how many days child plays at sports facilities/ovals where can be active for free play

Q63g: how many days child plays in school grounds for free play outside school hours

Q63h: how many days child plays in other places e.g. bush, empty block, river

Reliability items from time 2:

Q63ar: how many days child plays in yard at home

Q63br: how many days child plays in friends's/neighbour's yard

Q63cr: how many days child plays on own street/court/footpath

Q63dr: how many days child plays on nearby streets/courts/footpaths

Q63er: how many days child plays in park/playground

Q63fr: how many days child plays at sports facilities/ovals where can be active for free play

Q63gr: how many days child plays in school grounds for free play outside school hours

Q63hr: how many days child plays in other places e.g. bush, empty block, river
